

User Description

After you downloaded the the Plugin you have to install and activate it. For that you go to the Shopware Backend and there to the Plugin Library.

Then you go to Klipfolio, log in and create a Data Source.

The screenshot shows the Klipfolio Data Source Library. At the top, there are tabs for 'Dashboards', 'Klips', and 'Data Sources', with 'Data Sources' being the active tab. A button 'Create a New Data Source' is visible. Below the tabs is a search bar with the placeholder 'Find a data source...'. The main area displays a table of data sources, each with a checkbox, a name, a type icon, a format icon, a last refresh time, an owner, and a 'Shared' column. The table lists numerous sources, including various Google Drive, Salesforce, and Google Analytics connectors, many of which were created by Lena Wilken. Navigation buttons at the bottom indicate there are 11 pages of results.

Data Source Name	Type	Format	Last Refresh	Owner	Shared
Test kf produktmarketing	Google Drive		8 minutes ago	Lena Wilken	
CEO_Dashboard_Absolut_prod_fakt_Stunden	Salesforce		8 minutes ago	Jennifer Molske	
Test kf leads und opps	Google Drive		8 minutes ago	Lena Wilken	
Test kf produktmarketing	Google Drive		8 minutes ago	Lena Wilken	
Test kf produktmarketing	Google Drive		8 minutes ago	Lena Wilken	
Test kf google basecom	Google Drive		8 minutes ago	Lena Wilken	
Jennifer@Salesforce	Salesforce		8 minutes ago	Jennifer Molske	
Test kf direkteinstiege	Google Drive		8 minutes ago	Lena Wilken	
Bericht LTH_Summary	Salesforce		25 minutes ago	Jennifer Molske	
Google Analytics Landing Page Metrics (Last 2 Quarters)	Google Analytics		26 minutes ago	Lena Wilken	
Google Analytics KPIs by Month (Last 90 Days)	Google Analytics		26 minutes ago	Lena Wilken	
Google Analytics Default Channel Grouping Report (Prev MTD)	Google Analytics		26 minutes ago	Lena Wilken	
Google Analytics Metrics (YTD)	Google Analytics		26 minutes ago	Simon Heine	
Google Analytics Default Channel Grouping Report (Prev MTD)	Google Analytics		26 minutes ago	Simon Heine	
Google Analytics Landing Page Metrics (Last 2 Months)	Google Analytics		26 minutes ago	Lena Wilken	

We connect Shopware via the URL so you choose the REST/URL Button under Core Connectors.

Step 1: Select a Connector

Service Connectors
Retrieve data from these popular services.

Core Connectors
Service-agnostic data connectors.

- Upload a File
- REST/URL
- SQL Query
- FTP & SFTP
- Email Attachment

Then you go back to Shopware, to get your Shops URL.

You put your URL into the Query URL Field with the Extension '/klip/' and type in the information as shown.

Now you have to authenticate yourself. Select Basic HTTP Authentication under Authentication Type.

New Data Source

Enter a URL to an accessible file or resource.

Klipfolio can process Excel, CSV, JSON, and XML files from RESTful services. If authentication is required enter your credentials below.

Query URL: http://shopwarelernen.de.62-146-129-233.basecom-preview.de/klip/

Data Format: JSON

Encoding: UTF-8

Method: GET

Query Parameters

Authentication (OAuth, 2-Step, X-WSS, or Basic)

Type: Basic HTTP Authentication

Username: bsc_admin

Password: feier@basecom.de

Get Resource

Then go back to Shopware into the User Administration and check your Username. Also activate your API- Access and remember the API-Key generated. This is going to be your Password.

Put the name into the Username field in Klipfolio and use the API-Key as Password. Then click 'Get Resource' .

New Data Source

Enter a URL to an accessible file or resource.

Klipfolio can process Excel, CSV, JSON, and XML files from RESTful services. If authentication is required enter your credentials below.

Query URL: http://shopwarelernen.de.62-146-129-233.basecom-preview.de/klip/

Data Format: JSON

Encoding: UTF-8

Method: GET

Query Parameters

Authentication (OAuth, 2-Step, X-WSSE, or Basic)

Type: Basic HTTP Authentication

Username: bsc_admin

Password:
.....

Cancel

Now you should see something resembling this. If you do click 'Continue' .

Verify that this is what you want.

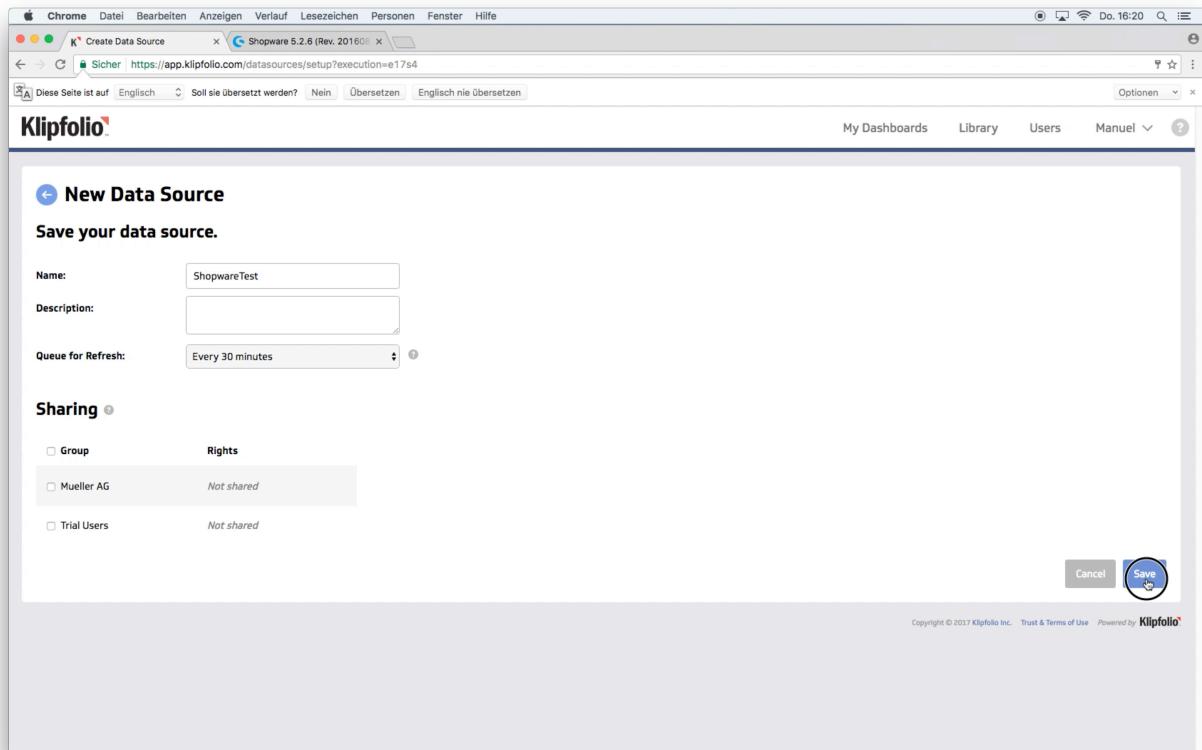

If it's not, modify the data source settings and try again.

- averageOrderValue
- averageNumberOrderPerCustomer
- numberOrders
- numberOrdersProcessed
- averagePriceSoldArticles
- soldPiecesPerDay
- averageSoldPiecesDay
- numberReturnedClients
- numberNewClients
- topTenArticleTurnover
- topTenArticlePiece
- topTenClientTurnover

Cancel Continue

Type in your Sources Name and decide how often it should be refreshed.

Then click save.

Now you can start using your Datasource. Click 'build a Clip with this Data Source'

Build a chart. By Clicking on the Data you can insert it in the Chart.
